

California Environmental Protection Agency

Department of Toxic Substances Control

**NOTICE OF  
PUBLIC MEETING  
ON THE  
ALMADEN QUICKSILVER COUNTY PARK  
SAN JOSE, CALIFORNIA**

The Department of Toxic Substances Control (DTSC) announces a public meeting to discuss the risk assessment which has been completed as part of the overall study of mercury contamination at the Almaden Quicksilver County Park in San Jose, Santa Clara County. The meeting date and location are:

Wednesday, September 9, 1992, at 7:00 p.m.  
New Almaden Community Center  
21727 Bertram Road  
San Jose, California

Representatives from DTSC will be present to discuss the following topics and to answer questions from the public:

- Risk Assessment
- Feasibility Study
- Future Phases of Work

For more information, please call Shirley Buford, DTSC Public Participation Coordinator, at (510) 540-3909, or Mark Piros, DTSC Project Manager, at (510) 540-3832, or write to these individuals at the following address: Cal-EPA, Department of Toxic Substances Control, 700 Heinz Avenue, Berkeley, California 94710. Reports pertaining to the investigation of mercury contamination at the park and the risk assessment are available for public review at this address, and will also be available at libraries in the San Jose area in the near future.
